Site Installation, Delivery and Fitting Hourly Rates

£25- per hour for delivery of goods, if delivered separately from the first day of fitting.

£28- per hour for the first day of fitting, including bringing tools to the site.

£25- per hour thereafter per. fitting session, while the tools are on site.

The minimum site visit is 4 hours and all rates are calculated in half hour increments.

The higher first day rate is because the business is workshop based, with a large amount of specialist machinery, tools & equipment.

When fitting on site, the relevant tools & equipment need to be assembled, chisels and planes sharpened, etc. and loaded onto the vehicle. The higher first day rate also allows for when the tools are returned to the workshop, unloaded and replaced in their workshop positions.

The hourly rate also includes time taken for shortages, breakages, modifications carried out in the workshop and removing old fitted furniture and fittings from the site before work can begin.
